

# Pensacola Storm - Sept. 22-23, 1842

Pensacola  
Struck by a storm that may have been a tropical  
storm and not a hurricane on Sept. 22. (Barnes  
1998)

This storm of less than hurricane strength was described at Pensacola on the 22nd and 23rd of Sept. It was likely a new storm born out of the same conditions that created the Galveston storm of the previous week.
